Results-driven Software Developer with a proven track record in developing and maintaining web applications. Proficient in PHP, Laravel, CodeIgniter, and JavaScript, with a keen focus on delivering innovative solutions. Additionally, I possess knowledge in ReactJS, React Native, Tailwind CSS, Python, and VB.Net. Excited to contribute my skills and passion, leveraging my commitment to code quality, collaborative mindset, and problem-solving abilities.

Work Experience

TriPlus Connect

Tacloban City, 6500

IT Lead

October 2025 to January 2025

- Manage and maintain company IT infrastructure, including networks, servers, and end-user devices, ensuring minimal downtime.
- Oversee technical support for staff, troubleshooting hardware, software, and connectivity issues.
- Implement IT security measures, including access controls, antivirus updates, and system monitoring.
- Provide guidance and mentorship to junior staff in IT procedures and best practices.

Mines and Geosciences Bureau - RO VIII

Candahug, Palo, Leyte, 6501

Senior IT Support Specialist

March 2025 to June 2025

- Led complex troubleshooting and problem resolution for hardware, software, and network issues across multiple departments.
- Coordinated IT projects, including system upgrades, migrations, and deployment of new applications, ensuring smooth implementation.
- Monitored and optimized system performance, identifying risks and recommending improvements for operational efficiency.
- Mentored junior IT staff, sharing best practices in network management, system administration, and user support.

Mines and Geosciences Bureau - RO VIII

Candahug, Palo, Leyte, 6501

Information Technology Specialist

February 2024 to March 2025

- Maintained network infrastructure, including firewalls, switches, and routers, ensuring continuous connectivity and minimal downtime.
- Administered server systems, databases, and internal applications, performing updates, backups, and user account management.
- Implemented IT security measures, including access controls, endpoint protection, and basic network segmentation, to safeguard data.
- Provided technical support and training to end-users, improving efficiency and reducing recurring issues.

Gathakad Information Services

Tacloban City, Leyte 6500

IT Support Specialist

December 2022 to February 2024

- Assisted graphic designers in coding and implementing layouts in Pageflex Studio/Storefront, ensuring designs functioned correctly online.

Projects

RVJ Sales and Inventory System

Successfully developed a robust Point of Sale (POS) system tailored for hardware and lumber stores. Built with PHP, CodeIgniter, and MySQL, the system streamlines sales, inventory, and customer management. Key features include real-time inventory tracking, comprehensive sales reports, and efficient customer data management. The system's intuitive design enhances operational efficiency, providing a seamless solution for businesses in the hardware and lumber industry.

Hotel De Fides Booking System

Engineered a dynamic hotel booking website utilizing PHP, CodeIgniter, and MySQL. This comprehensive system empowers users to seamlessly search, book, and pay for hotels while accessing detailed property information. Implemented robust features allowing hotel owners to efficiently manage properties, reservations, and customer data. The system's versatility extends to generating various reports and includes an intuitive admin dashboard, enhancing overall functionality and user experience.

<https://booking.hoteldefides.com/>

David's Pasture E-commerce

Successfully designed and developed a dynamic e-commerce website using Laravel and Bootstrap. Implemented a user-friendly interface with seamless navigation, contributing to an enhanced online shopping experience.

<https://shop.davidspasture.online/>

Escape from Disaster

Designed and developed a simple mini mobile game using React Native. Players assume the role of a survivor navigating through obstacles and challenges in the aftermath of a natural disaster, like an earthquake or hurricane. The objective is to skillfully overcome obstacles and reach safety, providing an engaging and immersive gaming experience.

<https://profile.zenabus.dev/projects.html>

iLife Coach

Crafted a stress and life coaching app with React Native, offering personalized coaching sessions, guided meditations, and stress-relieving exercises. The app facilitates real-time check-ins through a video call feature and provides a supportive community section for motivation. With a user-friendly interface and a personalized approach, the app empowers users to reduce stress and enhance overall well-being.

<https://profile.zenabus.dev/projects.html>

Pick App

Developed a user-friendly delivery app using React Native, catering to the seamless ordering and tracking of household essentials like vegetables and fruits from the wet market. The app features real-time tracking, enabling customers to monitor their deliveries. The app's intuitive design enhances the overall user experience.

<https://profile.zenabus.dev/projects.html>

Athlete Directory

Developed a comprehensive app for a university's basketball varsity team. Features include player stats, schedules, game scores, and photos. The user-friendly interface offers real-time notifications for players, coaches, and fans to stay updated on game developments. Coaches can effortlessly update information, ensuring seamless communication with fans about the team's progress.
